Renamed Resources in TruePlanning® 16 SR2

Some of the resources in TruePlanning® 16.2 have been renamed to accommodate different unit costs for resources that historically had the same unit costs across multiple cost objects. The names used to refer to these resources will need to be updated in specific, external Excel files before they will work properly and bring in the correct data into any projects.

Updating external Excel Worksheet Set files for import into TruePlanning®:

- **System, Assembly, and SOA Governance cost objects** – The resource name for "System Engineering" needs to be updated to "SystemEngineering_HighLevel."

  Note: In the TruePlanning® application, "System Engineering" is now called "Project Systems Engineer."

- **Software Component, Software COTS, Software Data, Software Maintenance Component, and Software Maintenance COTS cost objects** – The resource name for "Test Engineering" needs to be updated to "softwareQAEngineering."

  Note: In the TruePlanning® application, "Test Engineering" is now called "Software QA Engineering."

- **Facility and Communications New Projects and Managed Services New Projects cost objects** – The resource name for "Technician" needs to be updated to "itTechnician."

  Note: In the TruePlanning® application, "Technician" is now called "IT Technician."

Updating external Excel files for import as projects into TruePlanning® or TruePlanningXL™ files for use with Create Project:

- **System, Assembly, and SOA Governance cost objects** – The resource name for "System Engineering" needs to be updated to "Project Systems Engineer."

- **Software Component, Software COTS, Software Data, Software Maintenance Component, and Software Maintenance COTS cost objects** – The resource name for "Test Engineering" needs to be updated to "Software QA Engineering."

- **Facility and Communications New Projects and Managed Services New Projects cost objects** – The resource name for "Technician" needs to be updated to "IT Technician."
